

ECL Locking Expansion Connection

Product Release

06/2012

New or existing meter settings that include an expansion connection can be secured to discourage or prevent unauthorized removal of water meters. Once properly installed, a proprietary key is required to engage or disengage a proprietary security screw that recesses within the Expansion Connection. The security screw engages any one of several grooves on the barrel to prevent operation of the Expansion Connection.

- Expansion Connection provides a watertight connection
- Meter/Expansion Connection assembly can be easily installed or removed without a wrench
- Tamper resistant
- Proprietary security screw is locked or unlocked only with a proprietary access key
- Can be ordered less the security screw in order for the utility or municipality to procure their own unique security screw pattern and access key
- Access key sold separately
- All brass conforms to AWWA Standard C800 (ASTM B-62 and ASTM B-584, UNS NO. C83600 - 85-5-5-5)
- No-lead brass is available (UNS NO. C89833)
