

Extended Length Coupling

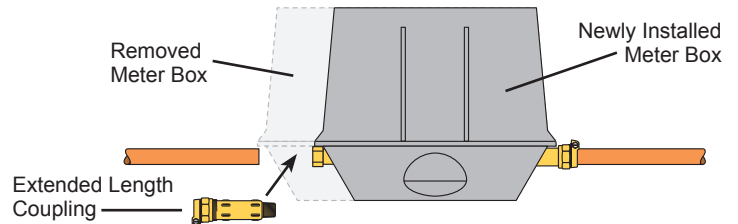

Product Update

01/2014

To address retrofit applications with different lay lengths, the extended length coupling allows the user to extend a service line up to 3". By sliding the pipe inside the long coupling, the length can be adjusted and the connection secured with the compression fitting. These new couplings facilitate both retrofit applications and new installations for both pipe fit and ease-of-assembly.

Extends a service line up to 3" when replacing a longer device with a shorter device such as a meter setting or valve.

Features:

- Compression end socket is designed without internal stops and allows a pipe or tube to slide into the 4^{3/4}" (4^{7/8}" body for -875 length) body providing adjustable travel
- External wrench lugs are provided on each end of the coupling body for fast and easy installation
- Rated AWWA C800 to 150 psi
