

### A Well-Rounded Solution

With over 40 years of providing reliable stainless steel clamps, Ford has improved the installation process with our redesigned clamping lugs. By eliminating the sharp edges, improving the lifter bar and changing the profile of the lugs, the updated FS product line offers an easier installation experience.

Rounded Corners on Sidebars

Bi-directional Tapered Lugs

Original Design

New Design

#### Features:

- Bi-directional tapered lugs for simplicity when fastening the lifter bar over the finger lugs
- Larger bolt holes in the lifter bar for smoother movement across the studs
- Rounded corners on sidebars and lugs
- Enhanced products include FRS Repair Saddles, FS Series Repair Clamps and FS300 Service Saddles
