

The Ford Plastic Pit Setter for 1½" and 2" Meters

In February 2000, Ford Meter Box introduced a Plastic Pit Setter for 1-1/2" and 2" water meters. This new concept for setting large meters gained rapid popularity because of its lightweight, durable construction and ease of installation.

The large meter setting device allows larger meters to be installed and maintained with the same ease and assurance as small meters while avoiding the safety concerns associated with entering the confined space of a vault.

The Ford Plastic Pit Setter for 1-1/2" and 2" meters features a pit

constructed from heavy-duty, corrugated plastic for lighter weight and extra strength. Like the Ford Pit Setters for residential meters, the 1-1/2" and 2" size Pit Setters offer a full range of inlet and outlet configurations for a variety of service line materials. Ford's large Pit Setters are available in single or tandem setter configurations with a variety of meter valves or check valves to satisfy any customer's needs.

Utilities appreciate a product manufactured to the high standards of The Ford Meter Box Company. Specifiers

can be assured that every installation meets their design specification no matter who installs the Ford Plastic Pit Setter. Installers appreciate the large Ford Pit Setter because it reduces excavation time and requires only two simple service line connections.

Fast, easy, and versatile installation makes the Ford Plastic Pit Setter for 1-1/2" and 2" meters a great value to any utility or contractor. For more information, contact your local Ford distributor or The Ford Meter Box Company.
