

## Uni-Flange® Restraint for C909 and PVC Pressure Fittings

Uni-Flange® offers the fastest, most economical and reliable method of restraining C909 pipe to C907 pressure fittings with the UFR1369 Series. The 1369 provides complete fitting restraint in a matter of minutes using only a wrench. Consisting of two split rings, the restraint portion fastens onto the C909 pipe while the backup ring sits securely behind the fitting bell.

### Features:

- Ductile iron restraint and split backup ring per ASTM A536
- 360° contact and support of pipe wall
- Clamping pads and tie rod lugs are co-located for ease of installation
- Rated at full-rated pressure of any class of C909 PVC pipe, minimum 2:1 safety factor
- Black Armorguard e-coat epoxy to ensure long-lasting pipe restraint
